

QUARTERLY ACTIVITIES REPORT SEPTEMBER 2020

Discovery Africa Limited (ASX: DAF) ("the Company"), is an Australian based mineral exploration company with an interest in the Warriedar Gold Project in Western Australia.

The Company provides the following update for the Quarter;

Exploration Activities

Warriedar Gold Project

The Company announced on 25 September 2020 that it had agreed terms with Bruce Robert Legendre ("Vendor") to purchase a 100% interest in the Warriedar Gold Project ("Project") - Exploration Licence 59/2405 in Western Australia, for a purchase price of \$5,000 cash (plus GST), to be paid to the Vendor.

The Project tenement covers 4 blocks and is located within the Yalgoo Mineral Field, approximately 60km west of Paynes Find. The Project covers a portion of a granite body close to the contact with mafic volcanic and sedimentary rocks of the Warriedar Greenstone Belt.

The Company reviewed historical data obtained from the WAMEX open file system and regional geological information, which identified a granite pluton covering most of the tenement area and a number of gold occurrences from low level prospector activity (as stated in the MINDEX system). The gold mineralisation may be associated with shear zones containing quartz veining. The southern part of the tenement has been identified as a possible target area from previous historical works.

The Company's review confirmed the tenement warrants a systematic exploration program for gold mineralisation involving structural interpretation of regional aeromagnetic and possible auger geochemical sampling along prospective structural corridors.

As such, the Company's near-term strategy to advance the Projects is:

- Review and assess historical exploration works and results from the Project area;
- Prepare a systematic exploration program for gold mineralisation within the Project area, which may involve structural interpretation of regional aerial magnetic survey data and possible auger geochemical sampling along prospective structural corridors; and
- Conduct follow up of any mapping works to identify drill targets, and subsequent potential drilling of selected targets.

Pinyalling Gold Project

The Company recently surrendered its interest in the Pinyalling Gold Project tenement (Exploration Licence 59/2112) in Western Australia.

The Company further considered its strategy with the Project noting the *Plan for Our Parks* initiative, covering the *Proposed Thundelarra National Park - Class A - FNA 15020*, which affects the Company's tenement, and if declared a Class A reserve, may impact the Company's ability to conduct further exploration works within the tenement. Whilst there is uncertainty in regard to the governments' actions on this matter, the Company conducted further consideration in response to this matter, and in October 2020 surrendered this tenement.

New Project Opportunities

During the Quarter, the Company continued to review mineral project opportunities and conducted due diligence over several projects that may complement the Company's current activities. These due diligence reviews and associated negotiations continue. Following completion of any successful project due diligence exercise and pending strategy to progress, the Company will consider any such opportunities and advance as and where required to progress with such project or projects.

Covid-19

The Company continues to take appropriate safety measures and actions to protect our staff and business operations, including precautions advised and regulated by the Australian Government. First and foremost, our priority is the health, safety and wellbeing of our staff, partners and community, and as such, the Company is actively monitoring the Covid-19 situation.

Corporate

The Company lodged its Annual Financial Report during the Quarter.

There were no mining production and development activities conducted during the Quarter.

Due to the impact of the COVID-19 pandemic, the uncertainty surrounding the Pinyalling Gold Project, and the desire of the Company to conserve costs in this uncertain period, there were no field exploration activities conducted during the Quarter.
